### Package contents

- 1 x multi-card reader and writer
- 1 x instruction manual

### About USB 3.0 and USB 3.1 Gen 1

USB 3.0 is also known as USB 3.1 Gen 1. This connectivity standard offers speeds up to 5Gbps.

**Note:** Data transfer rates are dependent upon the speed of the memory card you are using and the speed capabilities of the USB port on your host device.

### System requirements

- microSD™ card, SD™ card, or CompactFlash® card
- Computer, tablet, or device enabled with a USB Type-C™ port

The FCREADU3C is OS independent and doesn't require any additional drivers or software. The FCREADU3C receives enough power through the USB bus and doesn't require an additional power source.

System requirements are subject to change. For the latest requirements, please visit [www.StarTech.com/FCREADU3C](http://www.StarTech.com/FCREADU3C).

### Card support

The FCREADU3C supports the following types of memory cards:

- microSD, microSDHC™, microSDXC™
- CompactFlash Type I and Type II card
- Secure Digital (SDSC), Secure Digital eXtended Capacity (SDXC™) card, Secure Digital High Capacity (SDHC™) card

### Use the FCREADU3C

1. Gently slide a memory card into the appropriate card slot on the FCREADU3C until you feel resistance and the card is fully inserted.
2. Insert the **USB-C plug** on the USB card reader into the USB port on your computer, tablet, or device.
3. To access content on the USB card reader, follow the instructions specific to the OS that you're running.

**Note:** Avoid inserting multiple cards into the card reader at the same time. You can only access data stored on one card at a time.

### Troubleshooting

#### I can't access the data stored on my cards

If you're experiencing issues when you try to access the data stored on your memory card, consider the following:

- Some operating systems may not support all file formats. Make sure that the operating system you're using supports the type of memory card and the files that you're trying to access.
- If you insert multiple memory cards into the FCREADU3C, you won't be able to access the data stored on the cards at the same time. Make sure that you only insert one memory card in the card reader.

**Note:** The FCREADU3C prioritizes card access based on the most recent memory card that was inserted.

## FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by StarTech.com could void the user's authority to operate the equipment.

## Industry Canada Statement

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe [B] est conforme à la norme NMB-003 du Canada.
