Quick Start

AC1200 Dual Band WiFi USB Adapter

Model A6150

!

NOTE: Download and install the adapter software or standalone driver from the NETGEAR website before inserting the WiFi adapter into your computer.

December 2021

Set up your adapter with a Windows-based computer

Install the Windows standalone driver, insert the adapter into your computer, and join a WiFi network using your computer's built-in Windows WiFi network settings.

Install the Windows standalone driver

The Windows standalone driver allows you to use your computer's built-in Windows WiFi network settings to connect the adapter to a WiFi network.

1. Visit <https://www.netgear.com/support/download/?model=A6150> and download the latest software file for Windows.
2. Unzip the files from the .zip file.
3. Double-click the file that ends in .exe.
4. Follow the prompts to complete installation.

Join a WiFi network using the built-in Windows WiFi network settings

1. Make sure the Windows standalone driver is installed.
2. Insert the adapter into a USB port on your computer.
3. Open the WiFi network settings on your computer and select a WiFi network to connect.

For more information about how to connect to a WiFi network using your computer, see the Microsoft Windows support site.

Set up your adapter with a Mac computer

Install the Mac adapter software, insert the adapter into your computer, and join a WiFi network using the Mac adapter software.

Install Mac adapter software

1. Visit <https://www.netgear.com/support/download/?model=A6150> and download the latest software file for Mac.
2. Unzip the files from the .zip file.
3. Double-click the file that ends in .dmg.
4. Follow the prompts to complete installation.

Join a WiFi network using the Mac adapter software

1. Make sure the Mac adapter software is installed.
2. Insert the adapter into a USB port on your computer.
3. Click the  icon in your Mac's menu bar.
A list of WiFi networks in your area displays.
4. Select a WiFi network.
5. If the network is secure, enter its password or network key, and click the **Join** button.

The adapter joins the network, which might take a few minutes.

View your connection status

You can view the WiFi connection status using the adapter icon that displays in your Windows system tray or Mac menu bar.

The color of the icon indicates the strength of your WiFi connection:

-  **White:** Strong connection
-  **Yellow:** Weak connection
-  **Red:** No connection
