

ICY BOX IB-247-C31

USB 3.1 Type-C[™] (Gen 2) enclosure for 2.5" SATA drives

Key features

- External Type-C[™] enclosure for 2.5" SATA III drives •
- Enclosure made of high-grade aluminium •
- Connection to hostcomputer: USB 3.1 Type-C[™] (Gen 2) up to 10 Gbit/s
- Supports SATA III transfer rates up to 6 Gbit/s
- HDD height up to 9.5 mm, capacity unlimited
- USB cable: Type-C[™] to Type-C[™], length 60 cm

Packing content 1x IB-247-C31, 1x USB Type-C[™] cable, 1x screwdriver, 1x rubber feet, 1x manual, drives not included

15 square inch pure speed

The enclosure provides 2.5" drives with an environment in which they can fully exploit their transfer rates. Thanks to the USB 3.1 (Gen 2) Type-C^{to} connection, data is transferred from A to B with the maximum transfer rate specified by SATA III of 6 Gbit/s.

ICY BOX IB-247-C31 USB 3.1 Type-C[™] (Gen 2) enclosure for 2.5" SATA drives

AL - our favourite element from the periodic table

Aluminium - the material our accessory dreams are made of. Developed on the computer, melted in the blast furnace and finally milled from one piece of aluminium with the highest precision. More quality cannot be developed from a hard disk enclosure.

Fast pit stop

Cover up - remove drive, insert new drive, cover down - done. The CNC milled recess in the aluminium means that the exchange of hard disks and SSDs is no longer a nerve tear test.

Are we there yet?

The copying of a huge amount of data is pending and nobody wants to devote their undivided attention to the copying process. The integrated LED shows us in stylish blue whether hard disk access and therefore the copying process is still taking place - so that you can concentrate on the important things.
