Specifications

Table 1. Service features

Feature	Delivery specifications
Remote problem diagnosis and support	When experiencing a problem, the Customer must first place a call to a designated support telephone number. HP will provide basic telephone technical assistance with installation, product configuration, setup and problem resolution. Prior to any remote or offsite assistance, HP may ask the Customer to provide relevant information, start diagnostic tools and perform other supporting activities at the request of HP. HP will then work with the Customer remotely to isolate the hardware problem.
Offsite support and materials	If HP determines that the problem cannot be resolved remotely, HP will direct the Customer to return the defective hardware product to an HP designated repair centre, where HP will provide technical support. HP will provide HP-supported parts and materials necessary to return the hardware product to operating condition. HP may, at its sole discretion, elect to replace such hardware products in lieu of repairing them. Replacement parts and products are new or functionally equivalent to new in performance. Replaced parts and products become the property of HP. In addition, HP may install commercially available engineering improvements on the covered hardware product to enable proper operation of the hardware products and maintain compatibility with HP-supplied hardware replacement parts. At its sole discretion, HP may install any firmware updates that, in the opinion of HP, are required to return the covered product to operating condition or to maintain supportability by HP.
Return shipment	An HP authorised courier will return the repaired or replaced product to the Customer's location, if it is within the geographic location where the service was provided. Return shipment will be by ground transportation and usually takes between three (3) and seven (7) business days. The Customer may request accelerated delivery at an additional charge.

Shipment to the HP designated repair centre	<p>Depending on the purchased service level, HP offers different shipment options for delivering the defective product to the HP designated repair centre:</p> <ul style="list-style-type: none"> • Delivery by the Customer: With this option, the Customer is responsible for delivering the defective product to the HP designated repair centre. It is the Customer's responsibility to appropriately package and prepare the product for courier pickup. Service requests must be received before 12:00 p.m. local time to activate same-day pickup. All other service requests will be scheduled for next-business-day pickup.
