

Sale of Vehicle—D. F. 3231E

 CAUTION: Do not use the above procedure to determine the weight of a container that is not empty.

The Dell F3300 contains both video card and video controller. Video controller takes the data directly from power source and the component. New video controller is not available for the Dell F3300 system board.

Table 1. List of Non-Volatile Components on System Board

Description	Reference Designator	Volatility Description	User Accessible for external code	Remedial Action (Action necessary to prevent loss of code)
IC: FLASH MEMORY W25Q64V000	U302	Non-volatile Flash memory; 64Kbit Total time:sec	No	Firmware interface Disabled; it has hardware/software write protected
IC: EEPROM 24C02-40HT	U303	Non-volatile memory; 1024bit Total time:sec	No	Firmware interface Disabled; it has hardware/software write protected
IC: EEPROM N24C02-FRNBTF*	U301	Non-volatile memory; 2Kbit Total time:sec	No	Firmware interface Disabled; it has hardware/software write protected
IC FLASH XM25QH60 2J1ST	U305	Non-volatile Flash memory; 64Kbit Total time:sec	No	Firmware interface Disabled; it has software write protected
IC FLASH XM25QH40 2J1ST	U304, U306, U308	Non-volatile EEPROM/Mbit To I2C	No	Firmware interface Disabled; it has software write protected

△ **CAUTION** If the engine is not at regular intervals, the battery will be discharged. If the battery is discharged, the engine will not start. To avoid this, the battery should be recharged. If the battery is not recharged, the engine will not start. To avoid this, the battery should be recharged. If the battery is not recharged, the engine will not start. To avoid this, the battery should be recharged.
