Personal Cloud

BeeStation

Create your own cloud in minutes

With a built-in hard drive and everything preconfigured, BeeStation is ready to replace your current cloud storage services right out of the box. Designed for people who want to store, sync, and share personal files and photos with minimal setup, BeeStation centralizes your data from phones, tablets, computers, external drives, and cloud services, allowing you to access them anywhere—without any subscription fees.

Highlights

- Scan a QR code to begin—no storage or network expertise required
- Store, access, and share files over the web, or from your desktop or mobile devices
- Back up photos on your phone and let AI find who or what you're looking for
- Edit files on BeeStation from your desktop while keeping your progress synced across computers
- Back up files from Google Drive, OneDrive, Dropbox, and external drives to one central place
- Share storage with family and friends so everyone has their own personalized storage space
- 3-year warranty included

As easy as 1-2-3

Scan a QR code, plug in the power and Ethernet cables, and press a button to confirm—that's all you need to do after unboxing. After that, you're all set to start transferring files or photos to your personal cloud storage.

Store everything here. Access anywhere.

With 4 TB[1] of storage space, you can store all your work and personal files for years to come. Once they're on BeeStation, you can reach them from any web browser, as well as from the desktop or mobile apps. Also, since you can use your Google Account, Apple ID, or Synology Account to sign in, you won't have to remember any extra logins.

Never max out phone storage again

Backing up photos to BeeStation is as easy as opening the app. Once they're backed up, you'll have your life's memories with you wherever you go. Want to share a family vacation album, or get family members to add to it? With one link from the app, everyone can enjoy and contribute.

AI-powered photo organizer

Accelerated by its built-in NPU, BeeStation's AI makes it easier than ever to find the people, pets, or other things you're looking for. You can also explore a world map to rediscover photos from the places you've been. With these features and more, BeeStation takes the work out of photo organization.

Your digital workspace

View 100+ file formats, including image (even RAW files), video, Microsoft Office, compressed, text, and code files, right from your browser. You can

organize them with folders, virtual labels, and stars, and search for them using keywords, file types, and more. Once your files and folders are on BeeStation, they are readily accessible and shareable, no matter where you are. You also have the option to add password-protection or expiration dates to shared links to restrict who can open them.

Sync your progress across computers

With the desktop app, you can open files on BeeStation straight from Windows File Explorer or macOS Finder and edit them with any desktop software, such as Microsoft Office or Adobe Creative Cloud. Low on laptop storage? BeeStation's 4TB capacity has you covered, as long as you have an Internet connection. And since changes are constantly synced to BeeStation in real-time, switching between your work and personal computers is a breeze.
Keep your cloud and USB files in one place

Got files all over? BeeStation can sync files from Google Drive, OneDrive, Dropbox, as well as back up any connected USBs or other external drives. That way, if you ever lose access to a cloud account or can't find a physical USB drive, you can rest easy knowing you've got a backup on BeeStation.

Private spaces for each family member

Send an invitation link to any family member to give them their very own cloud space, completely separate from others. This process is even easier for them; all they have to do is sign in with their Google or Apple account.

Technical Specifications

General Specifications

Hardware	
Capacity	4 TB[1]
Processor	Realtek RTD1619B
Memory	1 GB DDR4
LAN port	1 × 1 GbE RJ-45
External ports	• 1 × USB-A 3.2 Gen 1 port • 1 × USB-C 3.2 Gen 1 port
Dimensions (H×W×D)	148.0 × 62.6 × 196.3mm
Weight	820g

Power Supply Unit / Adapter	36 W
AC Input Power Voltage	100V to 240V AC
Power Frequency	50/60 Hz, Single Phase
Power Consumption	• 7.85 W (Access) • 1.65 W (HDD Hibernation)
Operating environment	• Temperature: 0°C to 35°C (32°F to 95°F) • Relative humidity: 8% to 80% RH
Storage environment	• Temperature: -20°C to 60°C (-5°F to 140°F) • Relative humidity: 5% to 95% RH
Software	
Supported browsers	Google Chrome®, Firefox®, Microsoft Edge®, Safari® 14 and above
BeeStation for desktop	• Windows® 10 64-bit (build 19041 or above) • Windows 11 • macOS® 12.3 or above
BeePhotos & BeeFiles mobile apps	• iOS® 15 or above • Android® 8 or above
Interface languages	English, Deutsch, Français, Italiano, Español, Nederlands, Русский, Polski, Čeština, 日本語, 한국어, 繁體中文, 简体中文

Environment and Packaging

Certification	FCC, CE, BSMI, RCM, EAC, UKCA, KC, VCCI
Environmental safety	RoHS
Package contents	• 1 × BeeStation main unit • 1 × AC power adapter • 1 × RJ-45 Ethernet cable • 1 × Quick start guide
Warranty	3 years

Specifications are subject to change without notice. Please refer to the model's specifications page for the most up-to-date information.

1. 1 TB = 1 trillion bytes. Actual usable capacity is approximately 3.45 TB.
